EASYTRIEVE FOR BUSINESS PROFESSIONALS
THREE DAYS

Description

This course is designed to enable the business professional to understand the features of Easytrieve and be able to quickly produce well-formatted reports using Easytrieve.

Objectives

At the completion of this course, the student will be able to:

- Understand the concepts and structure of Easytrieve
- Write Easytrieve programs to produce complex reports
- Understand how procedures can be used to modify reports
- Use tables and arrays effectively

Topics

- Introduction
- Library section
- Simple reports
- Customizing reports
- Procedures
- Tables and arrays
- Macros and calls

Audience

This course is intended for staff who need to be able to quickly, efficiently and effectively produce and modify reports. This includes programmers, quality control staff business analysts who need to produce one time reports, and professional staff needing to extract selective records from files.

Prerequisites

The student should be familiar with the edit feature of TSO/ISPF, Cobol record descriptions and picture clauses, and submitting jobs with JCL.
